

See Concepts for the New Indian River Inlet Bridge

Workshops at Two Locations

Plan now to attend a workshop on design options for the new Indian River Inlet Bridge. Participate in either the Wednesday, April 23rd workshop at the Rehoboth Convention Center, or the Thursday, April 24th workshop at the Village at Bear Trap Dunes Clubhouse. Both sessions will run from 4:00 - 8:00 PM.

At the workshops you'll review bridge design options in terms of their ability to accommodate vehicles, bicycles and pedestrians, and in terms of a livable design that will complement the natural beauty and recreational character of the Inlet where the ocean meets the bay. The workshops will feature:

- Design themes and options for the bridge design, including lighting, railing and other features of the new bridge
- Access options between SR1 and the park and marina facilities at the Inlet
- Results of the April 9 community design charrette regarding bridge design and aesthetics

PUBLIC WORKSHOPS
4:00 - 8:00 PM

Wednesday, April 23
Rehoboth Convention Center

Thursday, April 24
Village at Bear Trap Dunes Clubhouse

Existing Indian River Inlet Bridge

Environmental Impacts

As with all transportation projects, DeIDOT is developing options that attempt to avoid, minimize and mitigate impacts on the natural environment and cultural resources. Your comments and ideas on this effort are welcome.

APRIL 23 WORKSHOP:
Rehoboth Convention Center
229 Rehoboth Avenue, Rehoboth Beach

APRIL 24 WORKSHOP DIRECTIONS:

West from Bethany Beach on Route 26 approximately 2 miles, turn left onto Central Avenue, proceed 1 mile to the Village at Bear Trap Dunes, turn left onto Willow Oak Street and proceed to the Clubhouse parking area.
